Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

The admin variation adds fifteen waste codes to this permit. The addition of these waste types do not change the nature of the facility's operation.

This admin variation also removes twenty six '99 codes' from the permit which are described as 'waste not otherwise specified'. There are no waste types accepted under these waste codes.

In addition to these, we updated the permit to include the Fire prevention condition for activities that involve the storage of combustible waste material.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
